**MODULE DESCRIPTION**

This subject is one of the fundamental subjects of biomedical program. A brief explains on the main uses or applications of the various equipment in the biomedical laboratory. This course will introduce the skills and techniques needed to work in the laboratory. Basic principles of various equipment are introduced.

**MODULE INTENDED LEARNING OUTCOMES (ILOS)**

On completion of this learning module, students will be able to:

M1.	Explain the properties of light, the optical theory behind image formation, the concept of resolving power and numeric aperture, and the causes and types of image aberrations.
M2.	Apply various techniques for specimen preparation, measurement, counting and staining using a microscope.
M3.	Understand the principles behind special microscopes including dark-field, phase contrast, polarized light, fluorescence, stereomicroscope, and electron microscope and their applications.
M4.	Able to demonstrate the correct safe work practices for operating a biosafety cabinet and fume hood
M5.	Proficiency in blood specimen collection and handling, demonstrating the ability to collect venous and capillary blood, ensuring proper labeling, storage, and transportation. Performing Blood group typing, ESR, and blood cross-matching.
M6.	Comprehend the importance of quality control measures in the laboratory, including using internal and external quality control materials, monitoring instrument performance, and conducting quality assurance procedures to ensure accurate and reliable test results.

These ILOs aims to enable students to attain the following Programme Intended Learning Outcomes (PILOs):

### ATTENDANCE

Attendance requirements are governed by the Academic Regulations Governing Bachelor's Degree Programmes of the Macao Polytechnic University. Students who do not meet the attendance requirements for the learning module shall be awarded an 'F' grade.

### ASSESSMENT

In this learning module, students are required to complete the following assessment activities:

Assessment Activities	Weighting (%)	ILOs to be Assessed
A1. Lab Practices	20%	M1, M2, M3, M4
A2. Mid-term exam	30%	M1, M2, M3, M4, M5
A3. Lab Practices	10%	M1, M2, M3, M4
A4. Final exam	40%	M1, M2, M3, M4, M5

This learning module is graded on a 100-point scale, with 100 being the highest possible score and 50 being the passing score.

Any students scoring less than 35% of the total mark in the final examination will be given an "F" grade for the module even if the overall grade is 50% or higher.

The assessment will be conducted following the University's Assessment Strategy (see [www.mpu.edu.mo/teaching\\_learning/en/assessment\\_strategy.php](http://www.mpu.edu.mo/teaching_learning/en/assessment_strategy.php)). Passing this learning module indicates that students will have attained the ILOs of this learning module and thus acquired its credits.

Your feedback is valuable for instructors to enhance the module and its delivery for future students. The instructor and programme coordinators will consider all feedback and respond with actions formally in the annual programme review.

## ACADEMIC INTEGRITY

The Macao Polytechnic University requires students to have full commitment to academic integrity when engaging in research and academic activities. Violations of academic integrity, which include but are not limited to plagiarism, collusion, fabrication or falsification, repeated use of assignments and cheating in examinations, are considered as serious academic offenses and may lead to disciplinary actions. Students should read the relevant regulations and guidelines in the Student Handbook which is distributed upon the admission into the University, a copy of which can also be found at [www.mpu.edu.mo/student\\_handbook/](http://www.mpu.edu.mo/student_handbook/).
