FACULTY OF APPLIED SCIENCES
BACHELOR OF IN ARTIFICIAL INTELLIGENCE
LEARNING MODULE OUTLINE

Academic Year	2025/2026	Semester	1
Module Code	COMP2113		
Learning Module	Operating Systems		
Pre-requisite(s)	Nil		
Medium of Instruction	English		
Credits	3	Contact Hours	45 hrs
Instructor	Dennis Wong	Email	cwong@mpu.edu.mo
Office	N46B, Wui Chi, Main Campus	Office Phone	8599-6875

MODULE DESCRIPTION

This learning module aims to help students to understand important concepts and algorithms in operating systems. Major components discussed are process management, virtual memory, I/O and file systems. Topics include process description and control, process scheduling, threads, SMP, mutual exclusion and synchronization, partitioning, paging, segmentation, memory management algorithms, disk scheduling and file systems.

MODULE INTENDED LEARNING OUTCOMES (ILOS)

On completion of this learning module, students will be able to:

M1.	Demonstrate an understanding of the fundamental concepts and principles of operating systems (C1, C2)
M2.	Analyze different approaches to operating system design (C1, C2)
M3.	Explain different techniques used for different user needs (C2, C5, C10)
M4.	Compare and contrast the key characteristics of modern operating systems (C2, C10, C13)

These ILOs aims to enable students to attain the following Programme Intended Learning Outcomes (PILOs):

PILOs	M1	M2	M3	M4
P1. Select and apply proven methods, tools and techniques to the effective and efficient implementation of information systems on common platforms, including the Internet platform;	✓	✓		
P2. Acquire essential knowledge in specific fields of computing disciplines including networking, artificial intelligence and security;				
P3. Apply necessary mathematical techniques to model, analyse and devise solutions to complex problems;			✓	✓

P4.	Work independently to develop an understanding of, and the knowledge and skills associated with the general support and mitigation of security risks of computer systems and networks;				
P5.	Design and implement relational database, with an emphasis on how to organise, maintain, retrieve and analyse information;				
P6.	Distinguish the fundamental and operational issues of computer systems, with considerations of user, business, ethical, societal and environmental needs;			✓	✓
P7.	Evaluate, prepare and communicate effectively on technical information to both technical and non-technical audience;				
P8.	Work as an effective member of a team in the analysis, design and development of software systems, with recognition of requirement to support equality, diversity and inclusion;				
P9.	Use project planning, risk management and quality management techniques in solutions to complex problems;				
P10.	Build the capacity and desire for lifelong learning and to learn advanced and emerging technologies on one's own;				
P11.	(For Business Intelligence specialization) Gain an in-depth knowledge of technologies related to data analysis and management of information to support business processes in enterprises;				
P12.	(For Gaming Technology specialization) Acquire the general and advanced knowledge of current technologies and operating environment for the development of the gaming and tourism industry;				
P13.	(For Computer Education specialization) Acquire general and practical knowledge of computer education and its practicing environment in secondary education;				

MODULE SCHEDULE, COVERAGE AND STUDY LOAD

Week	Content Coverage	Contact Hours
1	1. Background	3
	1.1 Review: overview of computer systems	
	1.2 Overview of operating systems	
2 – 4	2. Process Management	9
	2.1 Process description and control	
	2.2 Process scheduling: Round-robin and priority scheduling	
	2.3 Threads, symmetric multiprocessing	
5 – 8	3. Concurrency and Synchronization	12
	3.1 Mutual exclusion and critical section	
	3.2 Lost update problem and busy waiting vs. blocking	

		3.3 Interrupt disabling and spinlock	
		3.4 Semaphores and Readers/Writers problem	
		3.5 Deadlock and starvation	
9 – 12	4.	Memory Management	12
		4.1 Partition, paging and segmentation	
		4.2 Virtual memory	
		4.3 Address translation and page fault handling	
		4.4 Memory management – hardware	
		4.5 Memory management algorithms – OS support	
13	5.	Input / Output Management and Disk Scheduling	3
		5.1 I/O devices	
		5.2 Organization of I/O functions	
		5.3 I/O buffering	
		5.4 Disk scheduling, RAID	
14 – 15	6.	File Management	6
		6.1 Organization: files and directories	
		6.2 Secondary storage management	
		6.3 File systems: FAT and NTFS	

TEACHING AND LEARNING ACTIVITIES

In this learning module, students will work towards attaining the ILOs through the following teaching and learning activities:

Teaching and Learning Activities	M1	M2	M3	M4
T1. Lectures	✓	✓	✓	✓

ATTENDANCE

Attendance requirements are governed by the Academic Regulations Governing Bachelor's Degree Programmes of the Macao Polytechnic University. Students who do not meet the attendance requirements for the learning module shall be awarded an 'F' grade.

ASSESSMENT

In this learning module, students are required to complete the following assessment activities:

Assessment Activities	Weighting (%)	AHEP4 LOs	ILOs to be Assessed
A1. Assignment / Classwork	25	C1, C2, C5, C13	M1, M2, M3, M4
A2. Test	20	C1, C2, C5, C13	M1, M2, M3, M4
A3. Project	15	C1, C2, C5, C13	M1, M2, M3, M4
A4. Examination	40	C1, C2, C5, C10, C13	M1, M2, M3, M4

The assessment will be conducted following the University's Assessment Strategy (see www.mpu.edu.mo/teaching_learning/en/assessment_strategy.php). Passing this learning module indicates that students will have attained the ILOs of this learning module and thus acquired its credits.

Students with an overall score of less than 35 in the coursework must take the re-sit examination even if the overall score for the module is 50 or above.

Students with a score of less than 35 in the final examination must take the re-sit examination even if the overall score for the module is 50 or above.

Students with an overall final grade of less than 35 are NOT allowed to take the re-sit examination.

REQUIRED READINGS

STUDENT FEEDBACK

At the end of every semester, students are invited to provide feedback on the learning module and the teaching arrangement through questionnaires. Your feedback is valuable for instructors to enhance the module and its delivery for future students. The instructor and programme coordinators will consider all feedback and respond with actions formally in the annual programme review.

ACADEMIC INTEGRITY

The Macao Polytechnic University requires students to have full commitment to academic integrity when engaging in research and academic activities. Violations of academic integrity, which include but are not limited to plagiarism, collusion, fabrication or falsification, repeated use of assignments and cheating in examinations, are considered as serious academic offenses and may lead to disciplinary actions. Students should read the relevant regulations and guidelines in the Student Handbook which is distributed upon the admission into the University, a copy of which can also be found at www.mpu.edu.mo/student_handbook/.
