FACULTY OF APPLIED SCIENCES
BACHELOR OF SCIENCE IN ARTIFICIAL INTELLIGENCE
LEARNING MODULE OUTLINE

Academic Year	2025/2026	Semester	1
Module Code	COMP1122		
Learning Module	Introduction to Programming		
Pre-requisite(s)	Nil		
Medium of Instruction	English		
Credits	3	Contact Hours	45 hrs
Instructor	Dr. Chester Wong Un Hong	Email	chesterwong@mpu.edu.mo
Office	Room A320, Chi Un Building, Main Campus	Office Phone	85996453

MODULE DESCRIPTION

This module introduces fundamental programming techniques and principles using the popular Python Programming language. It aims to build fundamental software development skills including the use of the Python programming language and tools, debugging, testing and fundamentals of good programming practice, style and design.

MODULE INTENDED LEARNING OUTCOMES (ILOS)

On completion of this learning module, students will be able to:

M1.	Acquire fundamental programming techniques; (C1)
M2.	Analyse practical problems and write programmatic steps, such as flowcharts, to solve the problems; (C2)
M3.	Convert flowcharts to programmes; (C1)
M4.	Develop programmes in a structured manner; (C12)
M5.	Run, test and debug simple programmes; (C1)
M6.	Structure related data with built-in data structures. (C1)

These ILOs aims to enable students to attain the following Programme Intended Learning Outcomes (PILOs):

PILOs		M1	M2	M3	M4	M5	M6
P1.	Select and apply proven methods, tools and techniques to the effective and efficient implementation of information systems on common platforms, including the Internet platform;	✓	✓	✓	✓	✓	✓
P2.	Acquire essential knowledge in specific fields of artificial intelligence, including machine learning, computer vision and natural language processing;	✓					
P3.	Apply necessary mathematical techniques to model, analyse and devise solutions to complex problems;						✓
P4.	Work independently to develop an understanding of, and the knowledge and skills associated with the general support and mitigation of security risks of computer systems and networks;						
P5.	Design and implement both relational and non-relational data stores, with an emphasis on how to organise, maintain, retrieve and analyse information;						
P6.	Distinguish the fundamental and operational issues of computer systems and artificial intelligence applications, with considerations of user, business, ethical, societal and environmental needs;						
P7.	Evaluate, prepare and communicate effectively on technical information to both technical and non-technical audience;		✓				
P8.	Work as an effective member of a team in the analysis, design and development of software systems, with recognition of requirement to support equality, diversity and inclusion;						
P9.	Use project planning, risk management and quality management techniques in solutions to complex problems;						
P10.	Build the capacity and desire for lifelong learning and to learn advanced and emerging technologies on one's own.						

MODULE SCHEDULE, COVERAGE AND STUDY LOAD

Week	Content Coverage	Contact Hours
1-2	1. Introduction to Programming	6
	1.1. Structure of Python Programmes	
	1.2. Creating and Executing a Programme	
3-5	2. Variables and Data Types	9

		2.1. Variables and Naming Conventions	
		2.2. Numeric and Boolean Data Types	
		2.3. Strings	
		2.4. Assignment Operators and Assignment Statements	
6-8	3.	Control Flow Statements	9
		3.1. Conditions and If Statements	
		3.2. Comparison Operators and Logical Operators	
		3.3. Operator Precedence and Associativity	
		3.4. Loops	
		3.5. Flowchart	
9-11	4.	Functions	9
		4.1. Function Definition with Formal Parameters	
		4.2. Positional and Keyword Arguments	
		4.3. Calling Functions with Arguments	
		4.4. Scope of Variables	
12-14	5.	Built-in Data Structures	9
		5.1. Introduction to Tuples, Lists and Dictionaries	
		5.2. List Comprehension	
		5.3. Associative Access in Dictionaries	
		5.4. Looping Techniques	
15	6.	Text I/O	3
		6.1. Writing to a File	
		6.2. Reading from a File	

TEACHING AND LEARNING ACTIVITIES

In this learning module, students will work towards attaining the ILOs through the following teaching and learning activities:

Teaching and Learning Activities	M1	M2	M3	M4	M5	M6
T1. Lectures	✓	✓	✓	✓	✓	✓
T2. In-class tutorials and exercises	✓	✓	✓	✓	✓	✓

ATTENDANCE

Attendance requirements are governed by the Academic Regulations Governing Bachelor's Degree Programmes of the Macao Polytechnic University. Students who do not meet the attendance requirements for the learning module shall be awarded an 'F' grade.

ASSESSMENT

In this learning module, students are required to complete the following assessment activities:

Assessment Activities	Weighting (%)	AHEP4 LOs	ILOs to be Assessed
A1. Assignments	20%	C1, C2, C12	M1, M2, M3, M4, M5, M6
A2. In-class exercises and lab practices	20%	C1, C2, C12	M1, M2, M3, M4, M5, M6
A3. Test	20%	C1	M1, M3, M6
A4. Examination	40%	C1	M1, M3, M6

The assessment will be conducted following the University's Assessment Strategy (see www.mpu.edu.mo/teaching_learning/en/assessment_strategy.php). Passing this learning module indicates that students will have attained the ILOs of this learning module and thus acquired its credits.

Students with an overall score of less than 35 in the coursework must take the re-sit examination even if the overall score for the module is 50 or above.

Students with a score of less than 35 in the final examination must take the re-sit examination even if the overall score for the module is 50 or above.

Students with an overall final grade of less than 35 are NOT allowed to take the re-sit examination.

REQUIRED READINGS

STUDENT FEEDBACK

At the end of every semester, students are invited to provide feedback on the learning module and the teaching arrangement through questionnaires. Your feedback is valuable for instructors to enhance the module and its delivery for future students. The instructor and programme coordinators will consider all feedback and respond with actions formally in the annual programme review.

ACADEMIC INTEGRITY

The Macao Polytechnic University requires students to have full commitment to academic integrity when engaging in research and academic activities. Violations of academic integrity, which include but are not limited to plagiarism, collusion, fabrication or falsification, repeated use of assignments and cheating in examinations, are considered as serious academic offenses and may lead to disciplinary actions. Students should read the relevant regulations and guidelines in the Student Handbook which is distributed upon the admission into the University, a copy of which can also be found at www.mpu.edu.mo/student_handbook/.
